

D.P. Medical Systems Limited
Net Zero Commitment Statement

Our Commitment

D.P. Medical Systems Limited is committed to achieving **Net Zero greenhouse gas (GHG) emissions by 2050**. This commitment covers emissions across our operations and value chain and aligns with UK Government guidance, the Greenhouse Gas (GHG) Protocol, and PPN 06/21 requirements.

We recognise the urgency of addressing climate change and are committed to reducing our environmental impact through continual improvement, robust governance, and measurable carbon reduction initiatives.

Baseline and Scope of Emissions

Our carbon baseline year is **2022**, which serves as the reference point against which future emissions reductions are measured.

Emissions have been calculated using recognised UK Government conversion factors and are expressed in **tonnes of carbon dioxide equivalent (tCO₂e)**.

Emissions Scopes Included

- **Scope 1 (Direct emissions)**
 - Natural gas consumption at company facilities
 - Fuel consumption from company-owned vehicles
- **Scope 2 (Indirect energy emissions)**
 - Electricity consumption at company facilities
 - 100% of purchased electricity is sourced from certified green suppliers

Baseline Emissions (2022)

- Scope 1: **84.447 tCO₂e**
- Scope 2: **5.501 tCO₂e**
- Scope 3: **9.028 tCO₂e**
- **Total Baseline Emissions: 98.976 tCO₂e**

Current Emissions Reporting

The most recent reporting year is **2024**:

- Scope 1: **103.195 tCO₂e**
- Scope 2: **5.81 tCO₂e**
- Scope 3: Not applicable for this reporting year
- **Total Reported Emissions (2024): 109.005 tCO₂e**

While emissions increased during a period of business growth, sustainability metrics are now embedded to ensure emissions are managed relative to organisational expansion.

Carbon Reduction Targets

- **Short- to Medium-Term Target:**
Reduce total emissions by approximately **25% by 2028**, from 98.976 tCO₂e to approximately **75 tCO₂e**.
- **Long-Term Target:**
Achieve **Net Zero emissions by 2050**.

Carbon Reduction Initiatives

D.P. Medical Systems Limited has already implemented and continues to develop the following initiatives:

Completed and Ongoing Actions

- ISO 14001–certified Environmental Management System (certified January 2024)
- Introduction of sustainability performance metrics
- Increased proportion of low-emission and green vehicles in the company fleet:
 - 2022: 16.67%
 - 2023: 31.25%
 - 2024: 42.11%
- Improved heating efficiency resulting in year-on-year reductions in gas emissions
- Transition to paperless systems and enhanced recycling policies

Planned Actions

- Implementation of a new waste strategy during 2025
- Further development of sustainable office practices
- Behavioural energy efficiency measures, including powering down equipment rather than standby use

Governance and Accountability

This Net Zero commitment forms part of our wider Carbon Reduction Plan and environmental policy framework. Emissions data is:

- Calculated using recognised UK Government conversion factors
- Reported in line with the GHG Protocol and SECR requirements
- Reviewed and approved by senior management

Responsibility for delivery rests with the Board of Directors and the Quality Control and Environmental Management function.

Declaration

This Net Zero Commitment is endorsed by senior leadership and reflects D.P. Medical Systems Limited's ongoing responsibility to reduce greenhouse gas emissions and contribute positively to environmental sustainability.

Approved on behalf of D.P. Medical Systems Limited

Signed: Owen Pemberton
Managing Director
